

# Internship in Yokohama Technology Center of Apple Japan

Di Fan (D2), School of Science, Department of Physics

I feel very lucky to join an internship in Apple from 7<sup>th</sup> Jan. to 31<sup>st</sup> Mar. During these three months I learnt a lot about Apple, about its culture and about the people behind their amazing products.

Involved in the R&D of industry gives me a real sensation of how science and engineering are different and similar to each other. This internship experience really helps me determining my future career and directing the path I need to follow.

I am grateful to my supervisor Prof. Hasegawa, my ALPS instructor Prof. Fujimori and ALPS stuffs for supporting my research and this internship. I also would like to thank Kate, Josh, Nozu-san, Matsui-san and Iwasato-san for the help during my internship, I really appreciate this opportunity.
