

3rd FoPM International Symposium

Dates: February 8 - 10, 2027

Venue: Ito International Research Center and Koshiba Hall, The University of Tokyo

We will hold a highly interdisciplinary, international symposium for graduate students in physics, mathematics, applied physics, chemistry, astronomy, earth and planetary science, and neuroscience in February 2027, which will provide opportunities for students to interact with world-class scientists and present their research. The symposium is organized for students in the [FoPM Program](#), but all sessions will be open for any members of the UTokyo community.
